A Lightweight Steel Pole!

If you've ever carried a ranging pole you'll appreciate this new model of fluted steel tubing. Invincible is hollow—its corrugated cylindrical construction gives it unusual strength at a weight that compares favorably with that of wood. Breaking at the shoe line, warping and splitting are entirely eliminated in this advanced design.

Invincible gives a better and sharper image for accurate sighting—the deep corrugations diffuse surface glare. The colors last longer—an entirely new type of weather-proof finish, crack-proof and chip-proof, has been applied by a new process; and long after the outer edges of the flutings show signs of wear, the indented surfaces retain well defined red and white sections.

Invincible Tubular steel ranging poles are made in single lengths of 6 and 8 feet; in two jointed sections of 8 feet; and in three jointed sections of 12 feet. The jointed poles are furnished in a canvas case for ease in stowing and carrying.

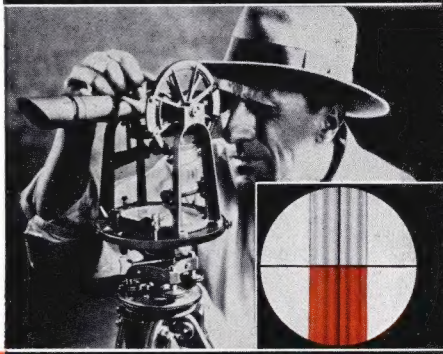
TUBULAR STEEL RANGING POLES

DURABILITY; New type of finish adds years to **INVINCIBLE'S** life. Indentations protect the surface from knocks.



VISIBILITY; Flutings break up halations and diffuse surface glare. Clearly visible under all weather conditions.
